CBD

Novel Food - Coordinate with us, and you can continue your business as usual.

We have already applied for the Novel Food Compliance; we have the submission numbers from European Industrial Hemp Association (EIHA) and two top US companies, though our applications are in review since the licenses won't be handed out for at least another year.

The Novel Food Compliance submission numbers for the CBD Business Limited and CBD Biotech Limited are CBD Public List Regulars RP327, PR438, and RP 427.

Our partners and own and white-label CBD Products Sellers and Hemp Raw materials Dealers in the UK and EU can keep on selling their products and raw materials until a decision is made on our applications.

What will happen to the products that you have already in stock from another manufacturer?

It was the responsibility of your manufacturer to apply for Novel Food status for the CBD products that they were manufacturing for you, but if they have not done so then, unfortunately, you will no longer be able to sell the held or new stocks.

You will violate the Novel Food rule if the FSA hasn't approved your manufacturer's Novel Food Application or if they have not applied for Novel Food certification before the deadline of **31st of March 2021.**

Fortunately, CBD Biotech Limited has applied for Novel Food approval, so we can continue sending supplies to our UK and EU customers without any hindrance to their business.

If you would like to ensure that your CBD products supply chain does not get interrupted.

You keep receiving CBD products in the UK or EU, and they are not pulled from shelves upon arrival for Novel Food violations, then contact us for our White-Label products range. Due to very high demand for our White-Label Products and Raw Material Suppliers, we will strictly deal with the applications on; first-come, first-served basis.

Understanding The Science Behind Our Products

OUR PEDIGREE

Our Biotech background has given us the capability to enhance the properties of CBD and other Cannabinoids by using the drug delivery systems of pharmaceuticals/ medicinal products and attaching the technology to the simple food supplements, enhancing the overall absorption and bioavailability rates up to 13 times more.

CBD OIL

Numerous tests and studies have shown that the absorption rate of CBD oils remains very poor; we encourage you to do some research. The main reason for this very poor absorption of between 6% to 10% is linked to the hydrophobic properties of CBD and the carrier oil. After administering, only a small amount of CBD Oil absorbs through the sublingual passage/ oral mucosa, and the rest excretes out without having any effect whatsoever. Another disadvantage of CBD Oil is resistance to the treatment due to the first-pass metabolism, which means the patients have to top up the dosage after using the CBD oil products for a certain duration.

CBD SPRAY

In comparison, our submicron spray provides a higher absorption rate and bioavailability of up to 83%. Once sprayed under the tongue, the product enters the bloodstream avoiding first-pass metabolism (It doesn't pass through the liver). The carrier solution is mixed in a tightly controlled GMP manufacturing facility. The end product is guaranteed to be free from microorganisms, oxidants, solvents, and catalyst residuals with no additives, flavours, and sugars.

NANOTECH CBD SPRAY

A CBD product that will prove to be the game changer !

We have formulated a unique range of CBD products for optimal benefits. We have chosen the drug delivery systems of the pharmaceutical products and sublingual formulations and plugged them with the CBD, CBG, CBN, and other cannabinoids to enhance their properties and absorption rates up to 13 times more, as compared to the CBD oil products.

Why CBD Sublingual Spray, developed by CBD Biotech, is the best CBD product available on the market?

Cutting edge gradient charged release technology with spontaneous sublingual absorption is developed for action within seconds, enhancing the bioavailability up to 83%.

Each spray delivers the precisely measured dose for optimal benefits.

Our CBD Spray

- ✓ **Full Cannabinoid Profile, Zero THC, Naturally Occurring Terpenes.**
- ✓ **Unique drug delivery system that enhances the absorption rate to 85%**
- ✓ **Free of Heavy Metals, Pesticides, Toxins, and Herbicides.**
- ✓ **Non GMO, Made From Swiss GACP Hemp.**

Bioavalability/Absorption Rates Explained

CBD Oil

6-10%

> 90% OF CBD OIL LEAVES YOUR BODY WITHOUT ANY ACTION

CBD Spray

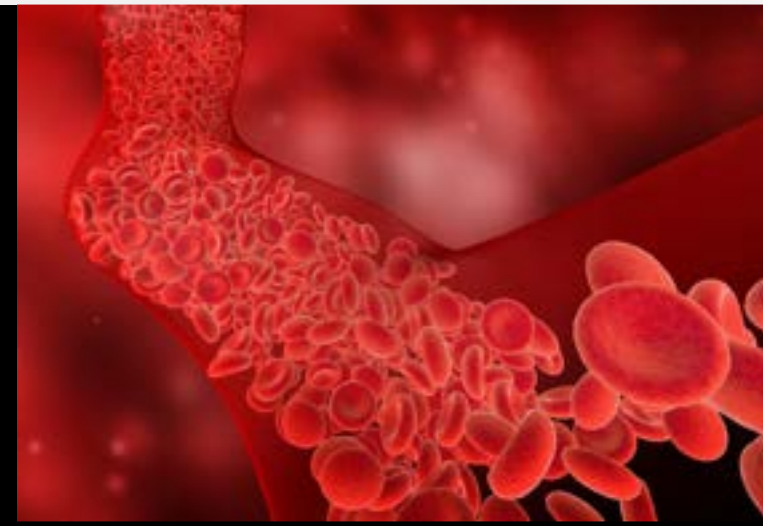

83%

Each Spray delivers gradient charged particles under the tongue called "Sublingual Passage".

Within seconds these macron-particles are absorbed into the veins via buccal mucosa

This allows CBD Spray formulations to quickly enter the bloodstream for optimal bioavailability of up to 83%

At CBD Biotech Ltd, we are proud to supply the market leading, top quality, and finest Broad-Spectrum CBD Oil free from any additives, excipients, artificial flavours, or colours.

We never use, Olive or Sunflower Oil, MCT, Vegetable Glycerine, or a mixture of numerous other oils.

Our Broad-Spectrum Oil is developed, using only organic hemp and nothing extra goes in to contaminate our purest Broad-Spectrum Oil for sale in the UK, Europe and around the World. We have kept the prices of our Broad-Spectrum CBD Oils very low to extend the health benefits of CBD to many those who desperately need top-quality, cleanest, and the purest CBD Oil at an affordable cost.
